# No.5 is a stylish and personal storage.

Slim dimensions and harmonious proportions characterize the flexible storage furniture No.5.

Modern design, stylish, clean and at the same time exclusive. No.5 isn't just a storage, it can easily create a nice aesthetic feel to the room.

# No.5

## Design Jesper Ståhl

No.5 is based on one basic module, which can be built or rebuilt indefinitely. The furniture can be varied by different back plates and accessories. Each basic module has a fixed intermediate wall which is not centered. The modules are all the same size with one large and one small compartment. These can then be fitted with doors, drawers and shelves which open with touch latches. Alternative backs can be purchased in various design. The back of the modules are finished with care to allow the product to be used as a double sided room divider.

In all its simplicity, the connector on No. 5 is a detail that stands out. The connection makes it easy to change and rearrange the furniture to suit your needs.
