

Alias

aline - T01

Tower with structure in extruded aluminium profiles and 6 stove enameled shelves depth 300mm.
Height adjustable feet in matt anodized aluminium.

design
Dante Bonuccelli

Linear. Light. Of a rigorous elegance. Bookshelves as the tasteful backdrop of a home or office. Designed by Dante Bonuccelli.

The architect-designer of Argentinean origin imagines a clean, extra-thin structure. Made from extruded aluminium, in the neutral hues of white, charcoal grey and anodised aluminium, it lets the books do the job of decorating the environment.

It can be assembled with maximum ease.

The structure can be equipped with containers, with tilt or sliding doors, and drawers, and is suitable for the installation of LEDs in the uprights, resulting in a subdued but highly suggestive scenographic effect.

Year warranty: 10 years
Production time: 0 weeks
Fire-retardancy
100% Recyclable
