Working in style. Sedus *attention* gets the looks with its confident style and sophisticated functionality. Above all, it's high quality design draws everyone's attention - stylishly customisable with three frame variants and numerous table top shapes.

**attention A: concentrating on the essential
has never been so elegant.**

A for attractive: *attention A* is a workplace, a focal point for small meetings and a unique eye-catcher in one. Every aspect is an invitation to wellbeing and productivity: from the height adjustable polished or powder coated die cast aluminium legs to the lightly floating appearance of the top. As a

desk or a meeting table, the clear, elegant styling conveys lightness and individuality coupled with functionality and concentration on the essentials. The result: *attention A* satisfies the highest demands and conveys a very special feeling wherever it is used - you're in the right place.

Elegant and intelligent. Optionally, integrated cable management keeps things tidy.

attention T: design and ergonomics hand in hand.

attention T gives you good reasons to like your job. The attractive and light design, for example, and in particular the many fitting options. Such as tool-less manual or motorised height adjustment, allowing a spontaneous switch from sitting to

standing while working. Whether as a single or a double workplace, individual design possibilities and extras such as the optional motorised Returnable ensure *attention T* meets ever increasing demands for flexible use.

Wide range of features.

The foot supports, leg frames and panels are available in a range of materials and colours to create customised designs. The cables are integrated discreetly in the optional cable guides or, if necessary, following the height adjustment.

attention T high conference: for meetings at the highest level – sitting and standing.

Whether a weekly jour fixe or a spontaneous presentation: with *attention T high conference* your office gains an attractive and flexible meeting place that, from one moment to the other, can be used sitting or standing. Widths of up to 3600 mm create space for productivity. Optional motorised

height adjustment that can raise the level to up to 1250 mm also offers plenty of freedom of movement for an active posture. Together they ensure greater attentiveness, more efficiency and a pleasant cooperative environment – even during longer meetings.

Height adjustment without the need for tools. Simple, quick and customised adjustment of the table height with an adjustment range of 650 – 850 mm.

Motorised height adjustment. With integrated sensor disconnection: simple adjustment at the touch of a button, for sitting and standing heights of between 650 mm and 1250 mm.

Memory function. Motorised height adjustment with digital display and memory function for four pre-selected heights is optionally available.

Elegant look. The gently curved panel provides an elegant finish and gives attention to its light appearance.

attention 4: stylish and timelessly beautiful.

Design and functionality, lightness and stability – with Sedus *attention 4* everything works hand in hand. Stylish elegance, timeless lines and the lightly floating appearance of the table top are inspiring without being intrusive. The functional and ergonomic details, such as tool-less height

adjustment, blend seamlessly into the overall aesthetic picture, underlining the stylistic expression. A quality the diversely customisable linking solutions and multiple workplaces also demonstrate.

Less is more.
The recessed leg in the linear linking system ensures greater freedom of movement.

Discernibly simple.
A scale on the tool-less ratchet height adjustment makes achieving a uniform height easier.

Practical. Cable management makes cables almost invisible and also appeals aesthetically.

The best table? One that exactly meets your needs!

One table system – endless configuration possibilities. Sedus *attention* is an attractive programme that fulfils the widest range of needs and applications with its three frame versions, new table shapes that can be individually selected and its extremely practical and ergonomic details. With *attention* you get exactly the workplace you need to do your job. Without compromises and in familiar high, long-lasting Sedus quality.

Double support beam.

The double support beams have been designed to harmonise perfectly with the frame versions and provide variable options for attaching extensions and accessories.

Frame versions.

With three shapes in a range of colours and finishes which can be individually selected, *attention* leaves nothing to be desired.

Table tops. The wide range offers the ideal prerequisites for creating your own unique workstation. You will find all the shapes and sizes on page 15.

Device holders. If necessary, all workstations can be fitted with a holder for devices such as a printer, laptop or PC.

Practical. Optionally available sliding tops provide quick and direct access to the cable tray below. The locking mechanism guarantees secure closure and prevents accidental movement of the desktop.

Lockable drawer. Personal items such as a tablet PC and mobile phone can be safely stored away from prying eyes, yet are nevertheless close at hand.

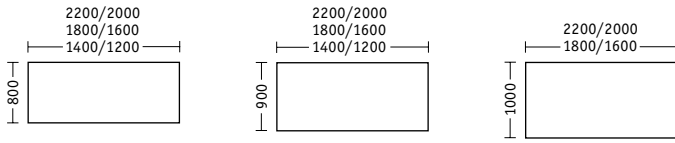

Function bridge. Thanks to special adapters for the function bridge, attention can be flexibly adapted to changing needs. To keep things organised, the third level can be fitted with a number of practical elements.

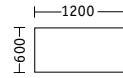

Opaque. The privacy screen made of opaque fabric blends perfectly into the overall look and ensures privacy.

Sustainable through and through.

Sustainability and quality “Made in Germany” have been key company principles at Sedus for more than 50 years. These principles are embodied in Sedus attention and reflected in the way we work: designing products which are recyclable, using ecologically tested materials, conserving resources, being energy-aware in our manufacturing and conducting ongoing quality tests.

For example, when producing the veneered *attention* table tops only selected woods such as beech, ash and oak from sustainably managed forests are used. State-of-the-art, energy saving and environmentally friendly production of the steel and aluminium components is also part of the quality and sustainability philosophy at Sedus.

Further information is available at www.sedus.com/se/en/philosophy/ecology

Innovative laser edging. Seamless edge processing of the highest quality creates a durable, attractive and environmentally friendly end product.

Native real wood veneers. A fascinatingly beautiful and environmentally friendly base material from sustainably managed forests.

Powder coating instead of paint finish. We employ the more eco-friendly and higher quality powder coating for finishing and protecting against rust.

Company:

Around the world, Sedus adheres to the principles of the UN Global Compact for human rights, labour standards, the environment and anti-corruption.
