

KALI
Table
By Jasper Morrison

PRODUCT INFORMATION

Kali table is designed by the world-known Jasper Morrison and is made out of massive wood, just like its predecessor Kali chair. Despite the massive table top the table express elegance and with three different sizes the table fits in to all different environments and meeting places.

"The table goes with last year's chair from Offecct. It's a simple, straightforward idea based on wood and genuine, honest handcraft, designed to enable local production in Tanzania eventually. It's somewhat pedagogical in its shape, hopefully without being too ordinary."
/Jasper Morrison

TECHNICAL INFORMATION

Frame and table top in white pigmented massive ash. The table is available in three different sizes.

ASH
