design made in germany Wilkhahn

Palette.

640 range

Palette range
Design: Karl-Heinz Rubner

Enduring yet adaptable. Timeless elegance
with versatile and tool-free adjustment.

Palette.
Simplicity, multiplicity.

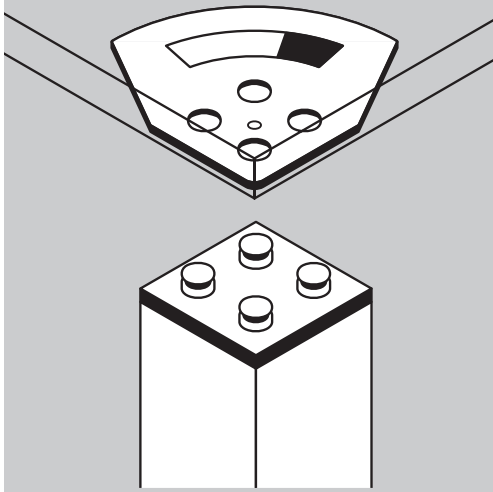
The most fundamental life support structure … A solid, linear table top, resting on four sturdy pillar-like legs. Palette represents the modern archetype of a work and conference table at which information is collected, tasks are allocated and decisions are taken.

Yet, Palette is more than an impressive table with finely honed design that projects high quality and prestige due to reduction to essentials: a leg can be released and moved along to take another table top with one swift movement. To create, extend or divide table configurations, as methods and numbers of participants require.

Palette is an excellent example of consistent standardization too: just one single, rectangular table top form and one type of table leg allow almost limitless scope for application. From a double workstation to a large conference configuration of any size.

The rigid blockboard tops allow a table construction that does not require a reinforcing frame. This not only creates ample legroom but also permits table tops not required at a particular time to be stacked compactly.

The key is an ingenious connecting mechanism: the table leg can be released and repositioned without the use of tools to allow it to be shared.



To extend the table surface, simply release the bayonet catch on the underside of the table top, move the leg along two pins, position the second table top on the two remaining pins and lock tightly.

Extendable in any direction: table tops linked along the short edges create a clearly defined seating order. Luxurious, leather-covered swivel chairs from the classic FS-Line are coordinated with the dark stained oak veneer with open-pore lacquering.

A host of different formats: the example features 150 x 150 cm (59" x 59") tops. If required, the configuration may be transformed into a smaller layout or into square single tables. Stackable cantilever chairs from the Sito range support such a versatile application.

Palette.
Continuity and change.

The faster the working world changes, the more important clear structures and organizing principles become that provide a sense of orientation and security. It is not without reason that a seating order at tables and table configurations has been regarded as a reflection of the inner structure of a community for thousands of years. At the family table, at a state banquet but also in a conference room.

Seat positions are clearly defined by legs that are perfectly aligned with the edge of the table top. Depending on the direction of linkage, long table configurations, compact surfaces or open table layouts are possible – full flexibility to meet current requirements. Regardless of the configuration, Palette tables always convey an appearance of continuity and sustainability.

The combination of prestige quality with maximum flexibility makes Palette a highly future-proof range. Not only can table tops and legs be assembled without the use of tools and stored extremely compactly, but the archetypal basic form allows Palette to be open to any application – ranging from a single stand-alone table to a linked configuration of virtually unlimited dimensions, from an executive's desk, a conference interior, a banquet room to a plenary setting. Continuity and change could not be combined more attractively and more economically.

Customized, yet flexible: an oval table configuration for open communication on equal terms. The radius has been determined so as to accommodate three chairs (Modus Conference range) per segment.

Palette. From a range to a principle.

The need to create conference interiors with symbolic character renders furnishing concepts employing standard solutions insufficient. The ingenious Palette principle makes it possible to specify customized solutions for such purposes to meet your specific requirements: square, rectangular or round table legs; straight, bullnose double or chamfer table edge profiles; a wide range of surface finishes and individually tailored formats and forms leave virtually nothing to be desired – including integration of state-of-the-art media technology.

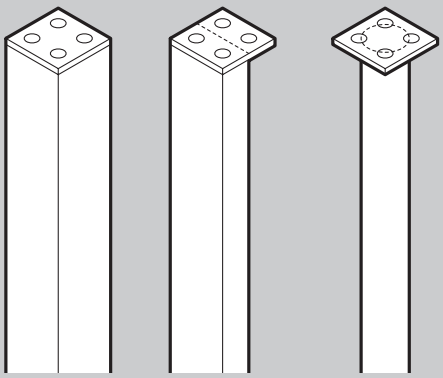
However your interiors are to be furnished:
Palette offers a unique presentation delivered via systemized and industrialized intelligence.

The Palette system leaves virtually nothing to be desired – whether you require modesty panels to match table tops in colour and surface finish or electrically retractable displays.

One principle with almost limitless appearances: in addition to the classic straight edge profile, bullnose double, undercut or chamfer versions are also available. And the individually positionable connecting mechanism can take square, rectangular or round table legs.

Leg forms

Square Rectangle Round



Please note: only tables with straight edges can be linked.

Palette.
Command communications.

Palette allows not only customized surface and edge finishes, formats and forms to suit your requirements, but may also be fitted with state-of-the-art media technology.

For this purpose, Palette offers a choice between two different concepts, depending on your focus in terms of functionality:

- **The additive concept:** CableXpress, the modular power supply system, comprises cable risers, cable track profiles with cable tracks and fold-down cable stations. The modules are easy to attach to the underframe of the table top and cables may be channelled to the table surface at any point required. The system is suitable for variable applications of Palette tables as these elements may be disassembled at any time, thus allowing the table to retain its multifunctionality.
- **The integrated concept:** alternatively, Palette configurations may be fitted ex factory with all features that modern conference technology has to offer in exact accordance with customer's specifications: ranging from cable outlets, tilt-up techi-stations with a choice of different modules for "plug-and-play" solutions to the integration of telephone conference modules, complete AV systems, digital computers or retractable displays. The result is customized solutions where technology is largely concealed, yet an integral part of the table configuration.

Wilkhahn is, after all, regarded as the global pioneer of providing support for conference processes by means of integrated communication and information technologies. We would be delighted to analyze your requirements together with you to find the concept that provides you with an optimal solution.

Individually configurable and removable as required: the modular CableXpress power supply system provides Palette with perfect cable management.

With either coherently designed table "portals" or high-quality, flush-mounted techni-modules – the functional and design versatility of the integral selected modules provides the right solution to suit any demands.

Form and function.

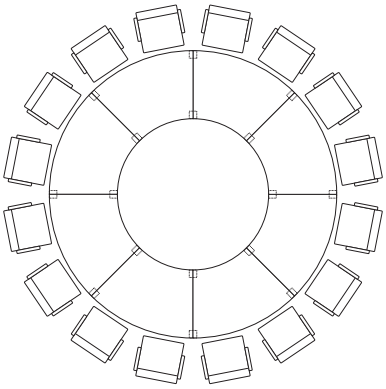
In conference interiors, the success of conference technology depends not only on what is used but how it is employed. With this in mind, Wilkhahn offers various systems for integrating such technology into tables:

- If coherent design is top priority, then table "portals" and cable outlets are used that are precision-crafted and exactly coordinated with table surfaces. They allow convenient access to large-volume cable channels featuring flexible arrangement of any data and power supply modules required.
- If efficient changeover for connecting different types of equipment is the order of the day, high-quality, dynamic techni-modules in aluminium are an ideal solution. Systemized, specifiable and retro-fittable modules ensure that connections may also be easily adjusted to keep pace with technical progress.

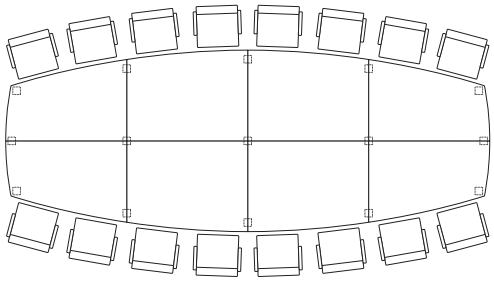
The Palette leg with power supply is a highly intelligent solution. All connections and cable management are directly integrated into the profile of the table leg.
This feature combines conference table tops with highly sophisticated pre-fittings to take technical equipment with the outstanding versatility of the Palette range: the table leg should always be positioned within easy access of a floor socket.

This product brochure shows you just a few of the wide variety of features and applications that we can offer you with Palette. Whatever your decision, Palette will provide you with table solutions of the highest degree in terms of design and function. We are looking forward to your challenge.

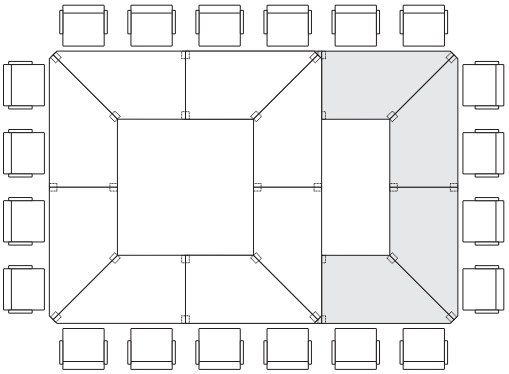
Palette. Layout examples.



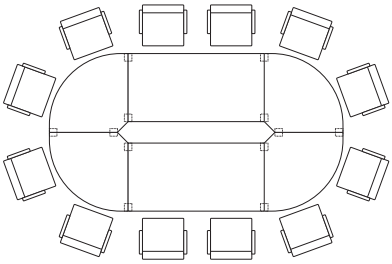
A round table is synonymous with open communication on equal terms. In the example, the radius has been selected to provide comfortable seating of up to 16 at eight segments.



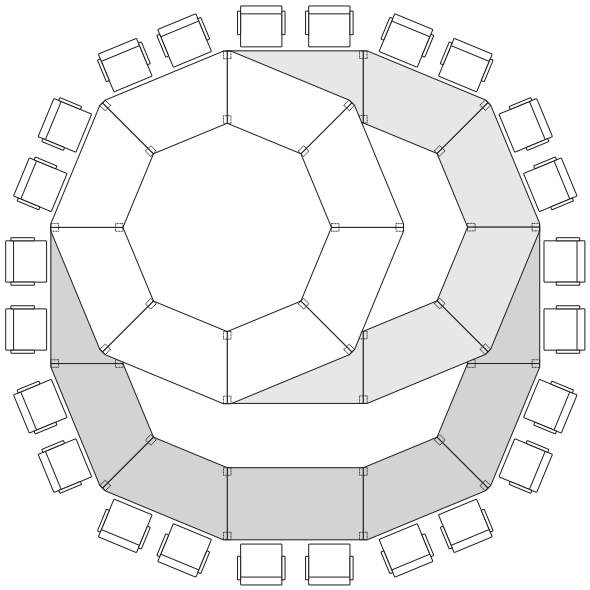
In an elongated room, barrel-shaped table configurations promote interaction among participants. The example shows a configuration for 16 – 18.



Infinitely extendable with standard table tops: from square to rectangle and back.

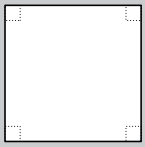


The oval table configuration comprises standard corner elements and rectangular elements. It is extendable in any direction as required.

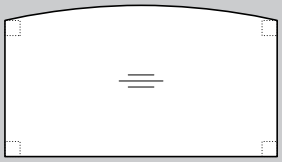


Individual, yet versatile: the octagonal table configuration to seat up to 16 may be extended by four seats by inserting two rectangular elements and by eight by using four rectangular elements.

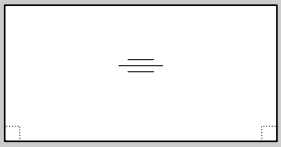
Standard formats. Materials. Surface finishes.



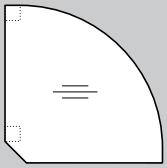
641/22
System table
90 x 90, H 73 (35⅜" x 35⅜", H 28¾")
May not be used as corner element
Frame aluminium coated
Frame aluminium anodized



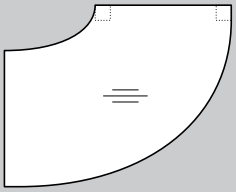
641/36
Starting element
100 x 180, H 73 (39⅜" x 70⅞", H 28¾")
With longitudinal veneer
Frame aluminium coated
Frame aluminium anodized



642/26
Extension element
90 x 180, H 73 (35⅜" x 70⅞", H 28¾")
With longitudinal veneer
Frame aluminium coated
Frame aluminium anodized



644/19
Corner element
90°, right-hand
90 x R 94 x 90 x 20, H 73
(35⅜" x R 37" x 35⅜" x 7⅞", H 28¾")
With longitudinal veneer
Frame aluminium coated
Frame aluminium anodized



645/29
Corner element
90°, left-hand
Elliptical
120 x 150, H 73 (47¼" x 59", H 28¾")
With longitudinal veneer
Frame aluminium coated
Frame aluminium anodized

All dimensions in cm/inches.

Frame
Legs in square aluminium profile, 100 x 100 mm (3⅞" x 3⅞"), clear or black anodized, or coated, each with four pins and connected with a bayonet lock integrated into the table top.
Adjustable glides in black polyamide.
Optional: legs in rectangular aluminium profile, 100 x 35 mm (3⅞" x 1⅜") or in round aluminium tube, ø 65 mm (2½") (chromium-plated surface finish possible in this case).

Table tops
Blockboard, thickness with veneer 34 mm (1⅜"),
with linoleum 38 mm (1½").

Surface finishes
Real wood veneer according to Wilkhahn veneer colour samples, optionally with a natural finish or colour-stained, in each case with low-solvent, open-pore lacquer, or linoleum according to Wilkhahn linoleum colour samples.
Laminated beech lipping, stained in the same colour, or with a natural finish.
Optional for special version tables: individually coordinated laminated wood lipping or solid wood lipping with bullnose double or chamfer profile.

Please note:
Corner elements 644/29 and 645/29 can only be used in conjunction with square and rectangular elements. Please pay attention to appropriate veneer direction.

Accessories
CableXpress 700 range: modularly structured, additive power supply system for perfect, customized cable management.

Cable outlets: slot-in system with covers, optionally in black plastic or aluminium, clear or black anodized. Alternatively: cable outlet with solid wood lipping and cover insert, in the same veneer and colour as the table surface.

Integral techni-stations: various dynamic modules with optional features for telephone, data and power supply, optionally for monodirectional or bidirectional operation, with a choice of surface finishes and versions.

Table "portals": customized table top cut-out sections with solid wood lipping, hinged covers with 180° opening function, also with solid wood lipping, and veneer and colour to match table surface.

Cable channels and cable storage baskets: individually configurable cable channels and cable management baskets in sheet steel or steel wire mesh, coated black or in the colour silver to match integral table modules.

Additional techi-modules and cable management systems on request.

Subject to technical change without notice.
