Technical

All Container table tops all attach to the container foot in the same way. The Container concept is that sand or treated water can be added to the foot to give it strength and stability. Water must always be treated with an anti-algae additive to prevent the water from becoming stale. There are Hex-bolts on the underside of each table which align with equally spaced holes in the mounting disk on the foot.

Maximum divided load per m² = 100kg

Cleaning Instructions

Moooi recommends using a good multi-surface spray cleaner and/or a trusted furniture polish with a soft cloth. Do not use abrasive cloths or substances and always read the label of any product you wish to use on or near items from the Moooi collection.
