D
 Um die Ecke gedacht: Warum sollten Ecken auf eine wichtige Dimension verzichten? CORNER nutzt diesen ganz speziellen Bereich des Raumes optimal aus und verwandelt ihn von der „dunklen Ecke“ in ein zentrales Gestaltungselement des Raumes, das sowohl an der Decke als auch an der Wand Lichtakzente setzt. Wahlweise mit Leuchtstoffröhren bestückt – natürlich schattenfrei ausgeleuchtet – oder mit LED-Einsätzen ausgestattet, bietet CORNER die Möglichkeit auch Farbe als Gestaltungsmittel einzusetzen. In jedem Fall können Decke und Wand im Wesentlichen unberührt bleiben, die Ecken werden zum Gestaltungselement.

E
 Lateral thinking: Why should corners dispense with an important dimension? CORNER makes ideal use of this very special area of the room and turns it from the “dark corner” into a central design element of the space by placing lighting accents both on the ceiling and on the walls. Optionally fitted with fluorescent tubes – illuminated without shadows, of course – or with LED elements, CORNER additionally offers the possibility to use colour as a means of design. In any case, ceilings and walls remain largely unaffected, while the corners become a design tool.

I
 Un'idea acuta: perché gli angoli dovrebbero rinunciare a una dimensione importante? CORNER sfrutta in modo ottimale questa zona molto speciale dello spazio e lo trasforma da "angolo buio" in elemento architettonico centrale dello spazio, per porre accenti di luce non solo sul soffitto ma anche sulle pareti. CORNER, che a scelta può essere equipaggiato con tubi fluorescenti (naturalmente illuminati senza ombre) o con LED, offre la possibilità di impiegare anche i colori come mezzo creativo. In ogni caso il soffitto e la parete possono restare sostanzialmente intatti, sfruttando invece gli angoli come mezzo creativo.
