

# Frost

Frost, design Stefan Borselius is a new type of screen that has been made from a type of expanded metal usually seen in slightly less refined environments in staircases, grating and flooring. The inspiration of Frost came from rime and the Scandinavian climate. The flocked surface contrasts nicely against the metal and lends the furniture a soft feel. The surface is flat, yet still vibrant and tactile. The combination of materials makes Frost a unique partition, which is both open and airy, while also providing a screen. The screen is easy to assemble with an allen key.

## FROST SCREEN

Screen is made from expanded metal net with a flocked surface in 4 colours. Measures includes foot.

Description	Art no	W x H x D mm	Weight
Frost screen, red	186 603 00	1000 x 1510 x 420	17 Kg
Frost screen, black	186 608 00	1000 x 1510 x 420	17 Kg
Frost screen, brown	186 607 00	1000 x 1510 x 420	17 Kg
Frost screen, beige	186 607 60	1000 x 1510 x 420	17 Kg

## ACCESSORIES
