

Series[e]

Series[e]

When it comes to Series[e], the only limits are set by your imagination. The multifunctional storage unit can be used in most environments; for spontaneous meetings, as seating furniture or room dividers. The series' modular design, different materials and finishes enables it to be customised for different work cultures, office layouts and personalised solutions. As Series[e] is easy to combine with a sound absorbing back panel, this storage unit is also very suitable for those wishing to reduce noise levels. The fact that the series is designed to fully utilise the material and to optimise transportation also makes this storage unit a really good environmental choice.

BACKSTOPS AND FILE-FOLDER BOOKENDS
The open shelves can be supplemented with extra shelves, backstops and file-folder bookends for optimal functionality. In addition, there are also a number of design options to choose from, for example A4 cassettes and extendable plastic crates.

REAR PANEL

The stylish rear panel makes it easy to put a personal touch on or rejuvenate the rear of the cabinet. This is due to the rear panel being available in a range of different finishes (Lamine, cork, grey lacquer or upholstered in fabric).

Tip: A cork panel functions very well as a notice board.

LANDSCAPE OR PORTRAIT?

Series[e] is available as a horizontal (L as in landscape) and standing (P as in portrait) document storage unit. Regardless of which you choose, very little space is wasted. Both storage alternatives are also fully compatible and can be combined with each other.

BASKETS FOR VARIOUS NEEDS

The filing baskets come in full and half-width sizes. If you want to store binders lying down, there is also a special binder basket for this purpose.

EXTENDABLE SLIDING RUNNERS WITH ACCESSORIES

Extendable sliding runners for binder and filing baskets and aids such as pen trays, form compartments and CD racks, etc. make it easy to design an interior based on your needs.

LATERAL SHELVES

The lateral shelf in powder-coated metal is available in widths from 600 to 1,200 mm. The shelf also works very well with binders.

SYSTEM DESCRIPTION/INSERT

WIDTH: 400 OR 1,200 MM?

Most units in the Series[e] range are 800 mm in width. There are also a number that are 400 and 1,200 mm wide.

FILING DRAWER

You can't go wrong with a robust filing drawer in silver-coloured sheet metal. Especially as the smart side handles make it easy to move around.

TOP LOADED STORAGE SECTION

The Series[e] one storage unit has a top-loaded storage section that is fitted with sliding door panels. One main advantage of this storage section is that you can select your own inserts; binder storage, filing basket or a combination of both. The sliding door panels are available in a silver grey or white finish, while the underframe is always silver grey.

CARCASSES/MODULES

The modules included in Series[e] offer a great level of flexibility. What about nine different heights, four widths and three depths which can be combined both laterally and vertically? You can, of course, also freely select from tambours, open shelves, drawers, sliding, wood and glass doors and drawers, as well as bases, legs or mobile underframes. There

is a selection of underframes to use with the table legs. The type of handle selected also enhances your storage unit. The series is available in a veneer finish or very robust Lamine™ (marked with a *), which is a woodlike surface coating. If not otherwise stated when ordering, note that the modules are delivered with a standard depth of 400 mm.

LEGS, CASTORS OR BASE?

Functionality or expression? It is your decision when it comes to underframes. Naturally, a base makes the floor easier to clean, while an underframe gives the cabinet a significantly more spacious look. There is also a mobile base available for anyone requiring a mobile storage unit (see page 15).

FRONTS

TA

The vertical tambour is fitted with a tambour brake to prevent pinching injuries. The tambour is available in wood or plastic and the colour of the handle blends well with the tambour as a whole. The storage unit is supplied with a lock.

HAND E These sturdy handles are made from dark grey plastic.

DO

This front with exterior doors has an opening angle of a full 270°. The angle offers maximum flexibility when selecting inserts. Note that right-hung doors are standard on fronts fitted with single doors. Therefore, it's important to state that you would like a left-hung door when ordering.

HAND 1 This stylish handle is made of plastic with a silver grey metal finish and has a 128 mm hole distance.

F

The filing drawer F is intended for A4 suspension files. F has a number of smart functions such as extendable sliding runners, anti-tilt and self-retraction. F is naturally supplied with a lock.

HAND 2 This sober handle is made with silver grey metal and has a 128 mm hole distance.

TAH

This horizontal and lock-fitted tambour is available in wood or plastic, and handle colours blend well with the tambour as a whole.

HAND 3 The handle has a 128 mm hole distance and has a silver grey metal and black plastic finish.

SDI

The sliding door panels are supplied with a lock and run in a hidden aluminium track.

PLUSHAND This robust dark grey plastic handle has a 128 mm hole distance.

PEDESTALS & MOBILE STORAGE UNITS

PEDESTALS Depth 600

PEDESTALS Depth 800

MOBILE STORAGE UNITS (MO)

FLEXIBLE STORAGE UNIT

Series[e] is a great choice if you require a flexible and extendible storage unit that helps you in your day-to-day work. The series is not only about storage – by adding a seat cushion to the pedestal, you get an extra seating space, for example.

INSERTS FOR PEDESTALS

As expected, pedestals can be fitted out in several different ways. The shallow drawers can be fitted with pen trays and form compartments, while the deep drawers can be fitted with full and half-format filing baskets, and with full-format binder baskets.

TOP IN TABLE HEIGHT

The tops of the tallest pedestals can be variably adjusted between 686 and 766 mm in order to fit under the height of the table.

2 DMT400 MOBIL

This is a very special storage unit for personal storage. It has space for two vertical binders, is supplied with a drawer and a tambour, as well as a binder shelf, pull handle, letter slot, clothes hook, name tag holder and four castors (two of which are lockable). As an optional extra, the top can be designed with rounded corners and extendable filing system insert.

MOBILE UNDERFRAMES

The MO underframe has lockable castors and is designed to align in height with the LSA and LS stationary cabinets.

Series[e] – PEDESTALS

CARCASS Sides, drawers: 16 mm – top panels: 20 mm – chipboard with wood veneer and solid wood lipping (oak, beech, birch) or Lamine™ (white, light grey or dark grey). **UNDERFRAME** Mobile, metal underframe (MO) with lockable castors. Available in white and silver. **MODULAR SYSTEM P** (Portrait) is ideal for vertical A4, and L (Landscape) for horizontal A4. **OPTIONS** Filing baskets, binder baskets, form compartments, suspension files, etc. **SCALE** 1:100. **UNIT** mm. * = Also available in extra sturdy Lamine™ (beech, birch) finish, a wood-like surface coating.
