zonit[40]

zonit[40]

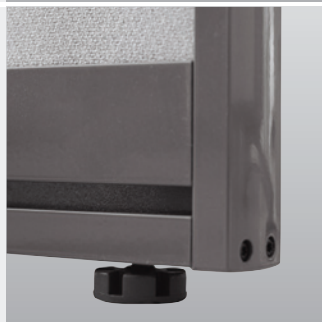

Open view and good sound level

Zonit[40] is available with a 400 mm high glass plate. With its sound-absorbent qualities, Zonit makes for a peaceful working environment

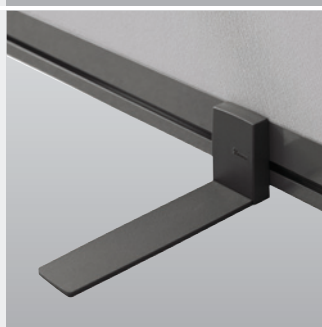

Uneven floors?

With the integrated leveller foot, it's easy to compensate for uneven floor surfaces

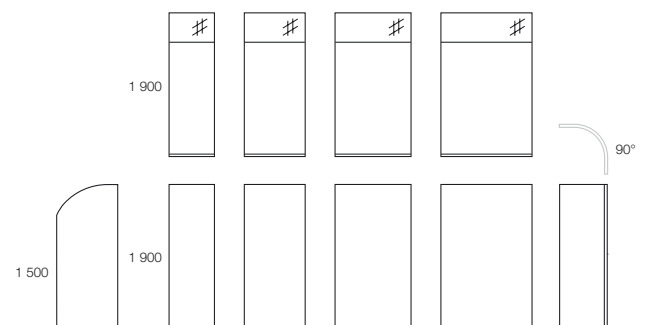

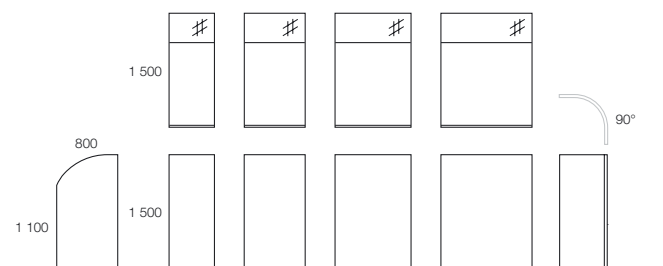

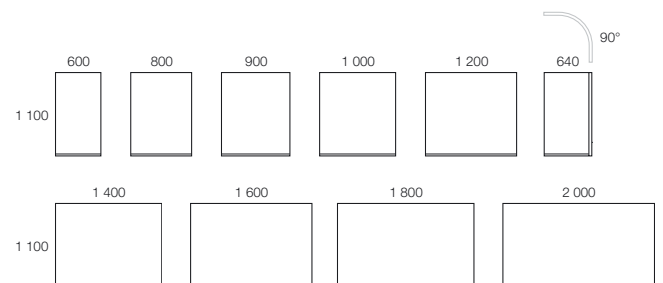

Stability and elegance

The design is stable with discreet support feet, which are easy to install in a horizontal rail.

Zonit[40] can be placed freestanding, between desks or to mark the boundary of a workplace. The screens come in three different heights and some units are available with a glazed upper section. All components in the series are filled with mineral wool and upholstered in fabric to improve the sound environment and make them pinnable. Other options available are a stabilizer foot, grounding kit and an anti-static finish.
