zonit[20]

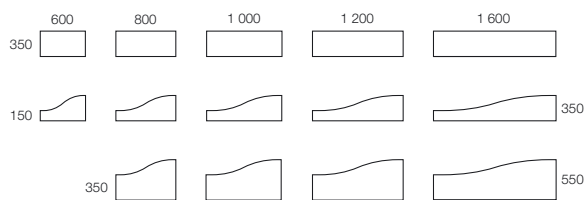

# zonit[20]

Zonit[20] is a series of desktop screens offering plenty of options. Installed between desks the screens can be used to shut out noise and create a private sphere in a shared workspace. On individual desks, they can be mounted to conceal a computer monitor, mark a boundary or to carry an efficient local storage unit.

## Desktop screen for installing in front of a table

## Desktop screen for installing on a table

### Peace and quiet

By fitting the screens between the tables, a separate surface with a comfortable sound level is achieved.

### Accessories

Desktop screen Zonit[20] allows the use of various local storage accessories like shelves, A4-trays, hooks, clips and nameplates.

### Discreet desk bracket

Easy assembly directly on the edge of the table.

## zonit[20] – table-mounted screen system
